

Species to Plant

At Bambuparque, we offer a variety of bamboo species suitable for different applications and climates. Some of the species we recommend for planting in Europe include:

- Bambusa Oldhamii: Known for its versatility and used in construction, crafts, and as an ornamental plant.
 - Phyllostachys Aurea (Golden Bamboo): Popular for handicrafts and small construction projects.
 - Phyllostachys Nigra 'Henonis': Suitable for construction purposes and has edible shoots.
 - Phyllostachys Viridis: A versatile giant bamboo used in construction, crafts, and has edible shoots.
- Phyllostachys Viridis 'Sulfurea': Similar to Phyllostachys Viridis, used in construction, crafts, and has edible shoots.
 - Phyllostachys Edulis (Moso Bamboo): Ideal for construction, timber production and new shoot production.
 - Phyllostachys Rubromarginata
 - Phyllostachys Manii 'Decora'
 - Phyllostachys Bissetii
 - Phyllostachys Bambusoides 'Holo-chrysa'
 - Phyllostachys Nigra 'Boryana'
 - Phyllostachys Viridiglaucescens
 - Phyllostachys Parvifolia
 - Phyllostachys Vivax
 - Phyllostachys Vivax 'Aureocaulis'
 - Phyllostachys Glauca
 - Phyllostachys Heteroclada 'Water bamboo'
 - Phyllostachys Aureosulcata 'Spectabilis'
 - Phyllostachys Aureosulcata 'Aureocaulis'
 - Hibanobambusa Tranquillans
 - Phyllostachys Humilis
 - Phyllostachys Tip-top
 - Semiarundinaria Makinoi
