Phyllostachys edulis

It is an **excellent option for forming forests.**

One of the largest bamboos in a temperate climate, it has rhizomes with a monopodial growth habit, which spread.

Without a doubt, it is the **most economically important bamboo in the world.**

Used for various **construction products, furniture, plywood and flooring.** It produces **pulp for paper and textiles.** Its **shoots are highly appreciated in cooking and the leaves are used for tea.**

Its cane can be used to produce **high-quality activated charcoal.**

Bambusa oldhamii

One of the largest species of the bambusa genus.

Although it comes from a tropical climate, it resists the cold very well.

It has rhizomes with a sympodial growth habit, which do not spread.

Perfect for hedges and windbreaks. Beautiful as isolated tuff. It is very popular on farms or cultivated areas. It generates an infinite amount of biomass, stakes that can be used in agriculture, etc.

Bamboo that grows extremely quickly, it has low maintenance and adapts very well to different soils.

Bambuparque is here to offer you the best bamboo for your project.

For decoration and garden composition.

To form a wind break, or a visual barrier.

To protect your residence, hostel, or your agricultural culture.

If you want to carry out large-scale planting and develop a business with cane for construction, charcoal production, cuttings for agriculture, cellulose and fiber for paper and textile production.

We have the best bamboo for you.
